REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the following:

1 (Currently Amended). A method comprising:
forming a photoresist by attaching a photoactive compound including diazonaphthoquinone to a polymer backbone; and
exposing said photoresist to extreme ultraviolet radiation.

The claimed invention is interpreted to be a method of forming a photoresist wherein the term "attaching..to a polymer backbone" has the meaning of being actually being on the polymer backbone to where a polymerization process is required to put the diazonaphthoquinone on the backbone. This definition is taken from the specification Fig. 1 and page 5, lines 11-22 and if seen in this light, none of the prior art references of record anticipate or render obvious the claimed method because the diazonaphthoquinone in the prior art is condensed onto a pendant group, namely hydroxystyrene in the case of WEST et al, OBERLANDER et al (5,866,295), McCULLOUGH et al (6,218,083) and ISHIZUKA et al (6,824,947).

Because none of the prior art references anticipate or render obvious the claimed invention, claims 1-8 are seen as allowable and passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The drawing filed January 21, 2004 has been accepted by the examiner.
